

COLT CONVERSION KITS

COLT M16 RIFLE CONVERSION TO COLT M4 CARBINE

Colt brand of conversion kits are the *most trusted and cost-effective* method of upgrading existing legacy models of M16 Rifles and M4 Carbines. All Colt conversion kits—including the new Colt M5 Conversion kits—are compatible with any variant from the Colt M16 and M4 family of weapons, offering "as-new" weapons with no impact to serial number inventory.

Various barrel lengths offered

Of the 165 individual parts in the M4 Carbine, 120 are replaced with genuine factory parts by a Colt conversion kit, bringing legacy firearms to state-of-the-art configuration at minimal cost. This upgrade solution provides the operator

with a weapon conforming to the strictest U.S. Government & Military Standards by using original Colt parts.

Conversion kit options include:

- Upper Receiver Assemblies
- Various Barrel Lengths
- Buttstock Assemblies
- Accessories
- Piston or Gas Impingement

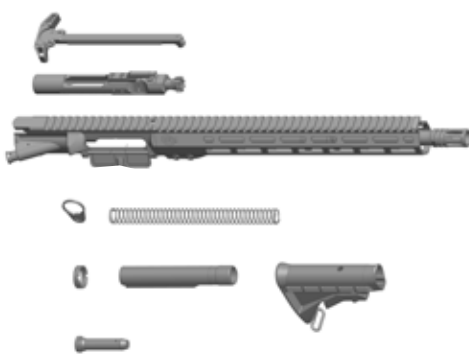

To make your upgrade process seamless, M*CARBO offers an on-site assessment of your inventory to identify your requirements, and offer custom recommendations to elevate your fleet. Specially trained M*CARBO Armorers offer instructions for your unit armorers on how to assess current inventory and how to convert Colt carbines and rifles.
